PROFILE SUMMARY

As a versatile full-stack developer, I bring a comprehensive skill set to the table, encompassing web development, Node.js, React.js, and the Express framework. Additionally, I possess expertise in PHP and MySQL, ensuring a strong foundation in backend development. With a solid grasp of Git version control, I effectively manage and collaborate on projects. With a passion for building scalable, efficient, and robust web applications, I excel in both front-end and back-end development, delivering high-quality solutions that meet and exceed expectations.

HotelRoomBooking is a comprehensive room reservation

HotelRoomBooking project: HotelBook is a cutting-edge room reservation system designed to streamline hotel bookings for both customers and administrators. The web application allows users to search and book hotel rooms effortlessly, with features like real-time availability checking, secure payment processing, and personalized booking management. The admin panel enables hotel staff to efficiently manage room inventory, rates, and bookings, as well as generate reports and analytics to optimize their business. Built with a user-friendly interface and robust backend architecture, HotelBook aims to revolutionize the hotel reservation experience, making it more convenient, efficient, and enjoyable for all stakeholders.
